Hi Chris,

Made contact with Lynn. We discussed the Area 40 pathway forward and the interagency agreement which is still under USEPA legal/management review. Lynn stated she would try and get me a copy hopefully by end of next week as there has been approximately 8 revisions since the last time we saw it. Talk to you soon.

-Pete

Subject: Area 40 FS Meeting - Follow Up

Thanks for meeting this morning. Based upon the discussion,

AR will:

- Update the RI plume map figures based upon the discussion between Marc Silva and Peter MacNicholl

- Determine if additional groundwater water level data is available from other programs to assist with groundwater flow direction west of Prairie City Road
- Create an alternative that incorporates more mass removal technologies, especially for the southern area.
- Send copies of maps and tables for Agencies to ponder prior to receipt of the FS

EPA will:

- Talk with DTSC about approach for management of Area 40
- Send AR comments on the draft RI and HHERA, estimated delivery March 9, 2016

Attached is a photo of the white board that identifies the risks that need to be mitigated for each receptor in the North Source Area, North Open Space, and South Area.

Christopher M. Fennessy, P.E.
